Plant Science, 68 (1990) 263–265
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX

Volume 68 (1990)

Abiotic inducers, sugars, β-D-glycanohydrolases, plant cells, 197
Abscisic acid, auxin, gravitropism, indole-3-acetic acid, xanthoxin, *Zea mays*, 17
Accelerated aging, soybean embryonic axes, natural aging, antioxidant enzymes, chemiluminescence, oxygen radicals, 27
Acetylene reduction, bacteroids, non-fixing mutant, *Pisum sativum*, nodules, microscopy, 151
Adiantum capillus-veneris, high-fluence rate response, chloroplast movement, phytochrome, blue-light photoreceptor, fern protonema, 87
Aluminum, pH, mutant, selection, fern, 257
Antioxidant enzymes, soybean embryonic axes, natural aging, accelerated aging, chemiluminescence, oxygen radicals, 27
Auxin, abscisic acid, gravitropism, indole-3-acetic acid, xanthoxin, *Zea mays*, 17
Auxin, H^+ ATPase, proton translocation, plasma membrane, *Nicotiana tabacum*, 33

B. campestris, *Brassica oleracea*, interspecific hybrid, physiological trait transfer, seed production, isozyme, cytology, 95
Bacteroids, non-fixing mutant, *Pisum sativum*, acetylene reduction, nodules, microscopy, 151
Barley, gabaculine, inhibition, chlorophyll synthesis, darkness, 65
Beta vulgaris L., bioregulator, net carbon assimilation, photosynthate partitioning, sucrose, taproot development, 57
Bioregulator, *Beta vulgaris* L., net carbon assimilation, photosynthate partitioning, sucrose, taproot development, 57
Blue-light photoreceptor, *Adiantum capillus-veneris*, high-fluence rate response, chloroplast movement, phytochrome, fern protonema, 87
Brassica, repetitive DNA, tandem repeat, nucleotide sequence, 223
Brassica juncea, leaf mustard, protoplast culture, plant regeneration, somatic embryogenesis, 231
Brassica napus var. *oleifers*, *Leptosphaeris maculans*, sirodesmin PL, zinc, resistance, brassilexin, 77
Brassica oleracea, *B. campestris*, interspecific hybrid, physiological trait transfer, seed production, isozyme, cytology, 95
Brassilexin, *Leptosphaeris maculans*, *Brassica napus var. oleifers*, sirodesmin PL, zinc, resistance, 77

Chemiluminescence, soybean embryonic axes, natural aging, accelerated aging, antioxidant enzymes, oxygen radicals, 27
Chilling, order/disorder transition, photosynthesis, phosphatidylglycerol, *Cucumis sativus*, *Gossypium hirsutum*, 189
Chitinase, cucumber, lysozyme, isoforms, PAGE, 9
Chlorophyll synthesis, gabaculine, inhibition, darkness, barley, 65
Chloroplasts, protein formation, 131
Chloroplast DNA heterogeneity, *psa*A, *psa*B, *rps*14, photosystem I, rice, 213
Chloroplast movement, *Adiantum capillus-veneris*, high-fluence rate response, phytochrome, blue-light photoreceptor, fern protonema, 87
Citrus sinensis, orange, stigmas and styles, phloroglucinol reaction, peroxidase, 47
Cucumber, chitinase, lysozyme, isoforms, PAGE, 9
Cucumis sativus, order/disorder transition, photosynthesis, phosphatidylglycerol, *Gossypium hirsutum*, chilling, 189
Cytochrome *b*-559 HP forms, distinctive stability, photosystem II particles, 71
Cytokinin, development, flower, gibberellic acid, indole-2-acetic acid, maize ear, 239
Cytokinin, growth regulator, wheat germ, glycoside, oligosaccharide, 175
Cytology, *Brassica oleracea*, *B. campestris*, interspecific hybrid, physiological trait transfer, seed production, isozyme, 95

Darkness, gabaculine, inhibition, chlorophyll synthesis, barley, 65
Development, cytokinin, flower, gibberellic acid, indole-2-acetic acid, maize ear, 239
Dispersed repeats, *Phaseolus vulgaris*, *Mbo*I repeat family, 203
Distinctive stability, cytochrome *b*-559 HP forms, photosystem II particles, 71

Embryogenesis, embryo culture, organogenesis, tissue culture, wheat, 103
Embryo culture, embryogenesis, organogenesis, tissue culture, wheat, 103

Fern, aluminum, pH, mutant, selection, 257
Fern protonema, *Adiantum capillus-veneris*, high-fluence rate response, chloroplast movement, phytochrome, blue-light photoreceptor, 87

Flower, cytokinin, development, gibberellic acid, indole-2-acetic acid, maize ear, 239
Fluorescent vital staining, *Verticillium* wilt, root culture, 123

Gabaculine, inhibition, chlorophyll synthesis, darkness, barley, 65
Garcinia mangostana L., leaf culture, plant regeneration, 113
Gibberellic acid, cytokinin, development, flower, indole-2-acetic acid, maize ear, 239
β-D-Glycanohydrolases, sugars, abiotic inducers, plant cells, 197
Glycoside, growth regulator, wheat germ, cytokinin, oligosaccharide, 175
Gossypium hirsutum, order/disorder transition, photosynthesis, phosphatidylglycerol, *Cucumis sativus*, chilling, 189
Gravitropism, abscisic acid, auxin, indole-3-acetic acid, xanthoxin, *Zea mays*, 17
Growth regulator, wheat germ, cytokinin, glycoside, oligosaccharide, 175

H^+-ATPase, auxin, proton translocation, plasma membrane, *Nicotiana tabacum*, 33
H^+-ATPase, spermidine, K^+ transport, plasma membrane vesicles, roots, *Zea mays* L., 183
High-fluence rate response, *Adiantum capillus-veneris*, chloroplast movement, phytochrome, blue-light photoreceptor, fern protonema, 87

Indole-2-acetic acid, cytokinin, development, flower, gibberellic acid, maize ear, 239
Indole-3-acetic acid, abscisic acid, auxin, gravitropism, xanthoxin, *Zea mays*, 17
Inhibition, gabaculine, chlorophyll synthesis, darkness, barley, 65
Interspecific hybrid, *Brassica oleracea*, *B. campestris*, physiological trait transfer, seed production, isozyme, cytology, 95
Isoforms, cucumber, chitinase, lysozyme, PAGE, 9
Isozyme, *Brassica oleracea*, *B. campestris*, interspecific hybrid, physiological trait transfer, seed production, cytology, 95

K^+ transport, spermidine, H^+-ATPase, plasma membrane vesicles, roots, *Zea mays* L., 183

Leaf culture, *Garcinia mangostana* L., plant regeneration, 113
Leaf mustard, *Brassica juncea*, protoplast culture, plant regeneration, somatic embryogenesis, 231
Lemna minor, vacuolar amino acids, methionine sulphoximine, 1
Leptosphaeris maculans, *Brassica napus* var. *oleifers*, sirodesmin PL, zinc, resistance, brassilexin, 77
Lysozyme, cucumber, chitinase, isoforms, PAGE, 9

Maize ear, cytokinin, development, flower, gibberellic acid, indole-2-acetic acid, 239
*Mbo*I repeat family, *Phaseolus vulgaris*, dispersed repeats, 203
Methionine sulphoximine, *Lemna minor*, vacuolar amino acids, 1
Microscopy, bacteroids, non-fixing mutant, *Pisum sativum*, acetylene reduction, nodules, 151
Microtubules, *Petunia hybrida*, organogenesis, PPB-index, PBB-value, mitotic index, 249
Mitotic index, *Petunia hybrida*, organogenesis, microtubules, PPB-index, PBB-value, 249
Mutant, aluminum, pH, selection, fern, 257

Natural aging, soybean embryonic axes, accelerated aging, antioxidant enzymes, chemiluminescence, oxygen radicals, 27
Net carbon assimilation, *Beta vulgaris* L., bioregulator, photosynthate partitioning, sucrose, taproot development, 57
Nicotiana tabacum, auxin, H^+-ATPase, proton translocation, plasma membrane, 33
Nodules, bacteroids, non-fixing mutant, *Pisum sativum*, acetylene reduction, microscopy, 151
Non-fixing mutant, bacteroids, *Pisum sativum*, acetylene reduction, nodules, microscopy, 151
Nucleotide sequence, repetitive DNA, tandem repeat, *Brassica*, 223

Oligosaccharide, growth regulator, wheat germ, cytokinin, glycoside, 175
Orange, *Citrus sinensis*, stigmas and styles, phloroglucinol reaction, peroxidase, 47
Order/disorder transition, photosynthesis, phosphatidylglycerol, *Cucumis sativus*, *Gossypium hirsutum*, chilling, 189
Organogenesis, embryo culture, embryogenesis, tissue culture, wheat, 103
Organogenesis, *Petunia hybrida*, microtubules, PPB-index, PBB-value, mitotic index, 249
Oxygen radicals, soybean embryonic axes, natural aging, accelerated aging, antioxidant enzymes, chemiluminescence, 27

PAGE, cucumber, chitinase, lysozyme, isoforms, 9
PBB-value, *Petunia hybrida*, organogenesis, microtubules, PPB-index, mitotic index, 249
Peroxidase, *Citrus sinensis*, orange, stigmas and styles, phloroglucinol reaction, 47
Petunia hybrida, organogenesis, microtubules, PPB-index, PBB-value, mitotic index, 249
pH, aluminum, mutant, selection, fern, 257
Phaseolus vulgaris, *Mbo*I repeat family, dispersed repeats, 203
Phloroglucinol reaction, *Citrus sinensis*, orange, stigmas and styles, peroxidase, 47
Phosphatidylglycerol, order/disorder transition, photosynthesis, *Cucumis sativus*, *Gossypium hirsutum*, chilling, 189
Photosynthate partitioning, *Beta vulgaris* L., bioregulator, net carbon assimilation, sucrose, taproot development, 57

Photosynthesis, order/disorder transition, phosphatidylglycerol, *Cucumis sativus*, *Gossypium hirsutum*, chilling, 189
Photosystem I, *psa*A, *psa*B, *rps*14, chloroplast DNA heterogeneity, rice, 213
Photosystem II particles, distinctive stability, cytochrome *b*-559 HP forms, 71
Physiological trait transfer, *Brassica oleracea*, *B. campestris*, interspecific hybrid, seed production, isozyme, cytology, 95
Phytoalexin, *Phytophthora*, proton conductance, 39
Phytochrome, *Adiantum capillus-veneris*, high-fluence rate response, chloroplast movement, blue-light photoreceptor, fern protonema, 87
Phytophthora, phytoalexin, proton conductance, 39
Picea glauca, seed proteins, protein body, ultrastructure, *Picea* sp., SDS-PAGE analysis, 163
Picea sp., seed proteins, protein body, ultrastructure, *Picea glauca*, SDS-PAGE analysis, 163
Pisum sativum, bacteroids, non-fixing mutant, acetylene reduction, nodules, microscopy, 151
Plant cells, sugars, abiotic inducers, β-D-glycanohydrolases, 197
Plant regeneration, *Brassica juncea*, leaf mustard, protoplast culture, somatic embryogenesis, 231
Plant regeneration, *Garcinia mangostana* L., leaf culture, 113
Plasma membrane, auxin, H^+-ATPase, proton translocation, *Nicotiana tabacum*, 33
Plasma membrane vesicles, spermidine, H^+-ATPase, K^+ transport, roots, *Zea mays* L., 183
PPB-index, *Petunia hybrida*, organogenesis, microtubules, PBB-value, mitotic index, 249
Protein body, seed proteins, ultrastructure, *Picea glauca*, *Picea* sp., SDS-PAGE analysis, 163
Protein formation, chloroplasts, 131
Proton conductance, phytoalexin, *Phytophthora*, 39
Proton translocation, auxin, H^+-ATPase, plasma membrane, *Nicotiana tabacum*, 33
Protoplast culture, *Brassica juncea*, leaf mustard, plant regeneration, somatic embryogenesis, 231
*psa*A, *psa*B, *rps*14, photosystem I, chloroplast DNA heterogeneity, rice, 213
*psa*B, *psa*A, *rps*14, photosystem I, chloroplast DNA heterogeneity, rice, 213

Repetitive DNA, tandem repeat, nucleotide sequence, *Brassica*, 223
Resistance, *Leptosphaeris maculans*, *Brassica napus var. oleifers*, sirodesmin PL, zinc, brassilexin, 77
Rice, *psa*A, *psa*B, *rps*14, photosystem I, chloroplast DNA heterogeneity, 213
Roots, spermidine, H^+-ATPase, K^+ transport, plasma membrane vesicles, *Zea mays* L., 183
Root culture, *Verticillium* wilt, fluorescent vital staining, 123
*rps*14, *psa*A, *psa*B, photosystem I, chloroplast DNA heterogeneity, rice, 213

SDS-PAGE analysis, seed proteins, protein body, ultrastructure, *Picea glauca*, *Picea* sp., 163
Seed production, *Brassica oleracea*, *B. campestris*, interspecific hybrid, physiological trait transfer, isozyme, cytology, 95
Seed proteins, protein body, ultrastructure, *Picea glauca*, *Picea* sp., SDS-PAGE analysis, 163
Selection, aluminum, pH, mutant, fern, 257
Sirodesmin PL, *Leptosphaeris maculans*, *Brassica napus* var. *oleifers*, zinc, resistance, brassilexin, 77
Somatic embryogenesis, *Brassica juncea*, leaf mustard, protoplast culture, plant regeneration, 231
Soybean embryonic axes, natural aging, accelerated aging, antioxidant enzymes, chemiluminescence, oxygen radicals, 27
Spermidine, H^+-ATPase, K^+ transport, plasma membrane vesicles, roots, *Zea mays* L., 183
Stigmas and styles, *Citrus sinensis*, orange, phloroglucinol reaction, peroxidase, 47
Sucrose, *Beta vulgaris* L., bioregulator, net carbon assimilation, photosynthate partitioning, taproot development, 57
Sugars, abiotic inducers, β-D-glycanohydrolases, plant cells, 197

Tandem repeat, repetitive DNA, nucleotide sequence, *Brassica*, 223
Taproot development, *Beta vulgaris* L., bioregulator, net carbon assimilation, photosynthate partitioning, sucrose, 57
Tissue culture, embryo culture, embryogenesis, organogenesis, wheat, 103

Ultrastructure, seed proteins, protein body, *Picea glauca*, *Picea* sp., SDS-PAGE analysis, 163

Vacuolar amino acids, *Lemna minor*, methionine sulphoximine, 1
Verticillium wilt, root culture, fluorescent vital staining, 123

Wheat, embryo culture, embryogenesis, organogenesis, tissue culture, 103
Wheat germ, growth regulator, cytokinin, glycoside, oligosaccharide, 175

Xanthoxin, abscisic acid, auxin, gravitropism, indole-3-acetic acid, *Zea mays*, 17

Zea mays, abscisic acid, auxin, gravitropism, indole-3-acetic acid, xanthoxin, 17
Zea mays L., spermidine, H^+-ATPase, K^+ transport, plasma membrane vesicles, roots, 183
Zinc, *Leptosphaeris maculans*, *Brassica napus* var. *oleifers*, sirodesmin PL, resistance, brassilexin, 77
